EDUCATION

Instituto Tecnológico y de Estudios Superiores de Monterrey, Campus Monterrey **Graduating in June 2024**
Bachelor of Science in Robotics and Digital Systems Engineering. **GPA** ***96 /100***
Bachelor of Science in Physics Engineering – Completed 2 out of 4 years of the program (**2019 – 2021**).

WORK EXPERIENCE

Micronics Software Solutions – Sales Automation and Growth Hacking Intern **Monterrey, N.L, Mexico**
Software firm with 9 employees providing IT and Open-Source solutions for value and growth generation. ***Sep. 2021 – Present***

- Management of digital marketing campaigns on Google and Facebook Ads for 3 companies.
- In charge of the design and implementation of growth strategies for companies' online marketing campaigns and websites.

MAJOR PROJECTS

Artificial Intelligence Projects **2021**
Employed several algorithms and data structures to solve projects for Harvard's Introduction to Artificial Intelligence course.

- Developed a BFS algorithm to find the shortest path to connect people, using data in more than 2 million registers.
- Constructed a Tic-Tac-Toe playing AI using the minimax algorithm and Minesweeper-playing AI, able to make inferences.
- Nim-playing AI able to teach itself how to play using reinforcement learning (Q-learning).

Data Science Project **2021**
Development of a Machine Learning model of classification to forecast rainy days using weather data provided by the Bureau of Meteorology in Australia.

- Data cleansing, normalization, and standardization. Applied and compared *KNN*, *logistic regression*, *decision trees* and *random forest* models. Used 10-fold cross-validation to evaluate a model's proficiency.
- Obtained 83% accuracy and over 62% recall in the predictions using the logistic regression model.

Music Recognition Algorithm in MATLAB **2020**
Engineered a music recognition algorithm in MATLAB able to identify a playing song in no more than 10 seconds.

- Applied the Fourier Transform to perform a time-frequency analysis of song files and microphone input, containing up to a dozen million data points.

Social Cause Flask Web App **2020**
Conceived a program in collaboration with MARCO museum to connect people to seniors in asylums during the first months of COVID-19 confinement by letters and artwork, reaching 36 receivers. Built a web portal to facilitate the sending process and increase outreach.

- Created the app in a 1-week span using Python and Flask, utilizing sessions, cookies, and a relational database to register users.
- Implemented frontend and backend logic and hosted the app and database using Azure Cloud technologies.

EXTRACURRICULAR ACTIVITIES

Marketing Director for the Student Society of Astronomy **2021**
In charge of the marketing campaigns and social media administration.

- Directed and established a scientific dissemination program in social media and led a content-creation team of 12 people.

SKILLS

PROGRAMMING LANGUAGES

Strongest	Python, C++, MATLAB
Familiar	C, PHP, JavaScript, Arduino

TECHNOLOGIES

SQL, HTML, CSS, Git, Pandas, Scikit-learn, Matplotlib, AWS, Azure, MQTT.

AWARDS

Won golden Medal at Veracruz Informatics Olympiad in **2017**.

COURSES AND CERTIFICATIONS

- CS50's Introduction to **Artificial Intelligence with Python**. **Ongoing**
- Diploma in **Data Science**. **2021**
- **Database Applications in PHP**. **2020**
- CS50's Introduction to **Computer Science**. **2020**
- **Inclusive Education**: Essential Knowledge for success. **2020**

PERSONAL

Able, autodidact, and motivated.
